Link til website:

<http://presstostart.dk/lommeregner/>

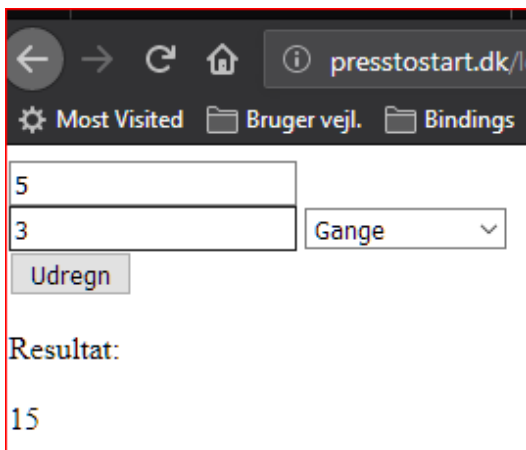

Sådan virker den:

1. Indskriv tal i felterne

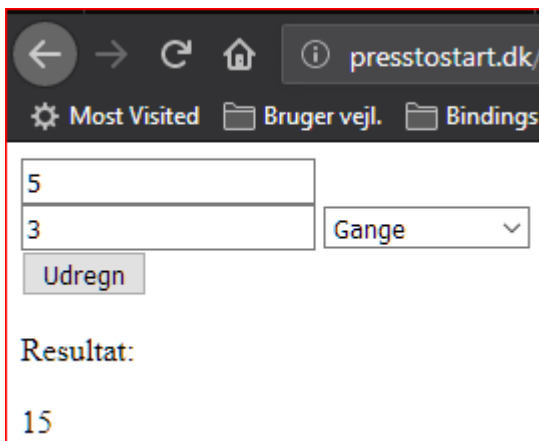

A screenshot of a web browser showing the URL `presstostart.dk/lo`. The page contains two input fields with the numbers 5 and 3. To the right of the second input field is a dropdown menu with the text "Vælg venligst". Below the input fields is a button labeled "Udregn". Underneath the button, the text "Resultat:" is visible.

2. Vælg en metode under dropdown "Vælg venligst"

A screenshot of the same web browser showing the dropdown menu now set to "Gange". Below the "Resultat:" label, the number "15" is displayed.

3. Klik på udregn

A screenshot of the same web browser showing the "Udregn" button clicked. The result "15" is now displayed below the "Resultat:" label.
